17. Check all **safety controls**
18. Test for **gas leaks**
19. Test for **carbon monoxide**
20. Check and replace **filter\***
21. Note and **advise customer** of deficiencies

\* **FILTER CHANGE:** Filter Change includes one poly filter, size 20x30x1  
or smaller. Special filters are available at an additional charge.

## COOLING INSPECTION/MAINTENANCE

Cooling visits take place in the Spring.  
Condensing Units and Evaporator/Swamp Coolers

1. Check and hose/clean **outdoor coil\*\***
2. Check and clean **outdoor fan blades**
3. Check and tighten **electrical connections**  
on outdoor unit
4. Check and inspection of **contactor**
5. Check and inspect **capacitors**
6. Check amp draw on **outdoor fan motor**
7. Check amp draw on **compressor**
8. Check high side **compressor pressure**
9. Check low side **compressor pressure**
10. Check bearings, lubricate **outdoor fan motor**
11. Check sub cooling/superheat for **proper  
refrigerant charge**
12. **Tighten service caps** to prevent refrigeration leaks
13. Clean debris from **outdoor unit**
14. Clean **blower motor** on indoor unit
15. Check **blower and motor**
16. Check for proper temperature drop  
across **indoor coil** (split)
17. Check for tight electrical connections on **indoor unit**
18. Check for proper **thermostat calibration** and operation
19. Inspect and clean **condensate drain line**
20. Check for proper **drain line pitch**
21. **Wipe down** exterior cabinet
22. Check and replace **filter\***
23. Note and **advise customer** of deficiencies

\*\* **COILS:** Water hose bib must be within 25 feet of condenser.  
Extremely dirty coils are subject to an additional charge.

## ELECTRICAL INSPECTION

Electrical Inspections can be done  
anytime of the year.

1. Check **main electrical panel** for  
tight connection, UL listed breakers,  
age and properly sized
2. Check all **breakers and fuses**
3. Check that **main breaker** is sized  
correctly (if applicable)
4. Check **sub-panel** (if applicable)
5. Test all **GFCI outlets** and confirm  
they are in all the areas required
6. Check all **outdoor receptacles** to see  
that they have weatherproof covers
7. Check for **ARC fault protection**
8. Check **AC Breaker size** (if applicable)
9. Check **AC disconnect** switch sized correctly  
(if applicable)
10. Check all **AC wiring** done correctly and safely  
(if applicable)
11. Check **furnace wiring** to make sure  
it is done correctly and safely.
12. Check for **smoke alarms** in all bedrooms;  
test for proper operation and not out of date.
13. Check for **carbon monoxide alarms** and test  
for proper operation and not out of date.
14. Note and **advise customer** of deficiencies
